Website Maintenance & Optimization

Start taking advantage of your website by keeping the content updated and optimized for the search engines.

Our maintenance program helps to simplify the task of owning and operating a successful website.

When you require changes or updates, simply send us a quick e-mail and sit back and watch as your site is updated. Most changes will be initiated within hours of your request. We automatically include our highly effective search engine optimization techniques into every piece of content that we touch.

You will receive an e-mail confirmation once your changes have been completed.

VIP Treatment &ndash; Because we work on a retainer system, your projects have top priority. Our programmers and designers often work around the clock to keep our customers's web sites in top form.

Emergency Response - Immediate priority is given to rush jobs that are significant to your online business and reputation. If you ever need something done ASAP, just let us know.

Billing &ndash; You will initially pay a deposit of \$200 to activate your contract. After that point you will be billed at the hourly rate of \$100/hour. Don't worry, we actually bill by the minute. (12 minutes means 12 minutes, not 30 minutes)

**Price : \$200.00**
