

On Page Image Gallery

Model : -

On Page Image Gallery

On Page Image Gallery with Multiple Categories

With this flash image gallery, your users can click the thumbnail to preview the enlarged image right in the same space. A graceful discription is displayed above the image. A second click returns the user to the full gallery.

- Unlimited Categories
- Unlimited Imges

Customizing Your Gallery

1. Edit the xml file (using notepad is perfect)
2. Upload your thumbnails
3. Upload your main images

What You Receive

We will install the gallery to your server and embed the gallery into one page of your website. You can then customize the images, titles, and descriptions to suit your application.

Requirements

You must have access and be able to upload images and files to your webserver. Basic editing of a text document will also be required to configure your images. We can customize the gallery with your images and information for an additional fee if you like.

Optional Products

An easy to use XML Editor can also be added to this package for easier customization. It is recommended if you plan to make frequent changes or do not have the ability to upload images or files to your server.

Price : \$95.00

Options available for On Page Image Gallery :

Installation

On one web page, On 2 web pages (+\$50.00).
