Property Listings Website

The Ultimate Property Listing Website

A highly visible way to list "rental" or "for sale" properties.

This website package is similar to our Ultimate Realtor Website Package but it has fewer features and is less complex.

Package Highlights

- List an unlimited number of properties
- Create multiple town or region categories
- Create "for sale" and "for rent" categories
- Display multiple photos of each property
- Powerful listings search tool
- Application can be added to an existing website or function as a stand alone website
- Admin panel to manage all property content any time

Unique Features That Improve Search Engine Visibility

- Dynamically Optimized for the Search Engines – Critical elements like page titles are automatically created when adding listing information. Manual control is also available for total optimization.
- Optimized Property Images – The site automatically assigns a search engine relevant name to photos.

Unique Features That Improve The Visitor's Experience
