

Ultimate Dynamic Website

Model : -
Ultimate Dynamic Website

Static websites are easily outgrown. A dynamic website can grow with you and allow content to stay new and relevant without hiring a web designer or buying any special software.

You are in TOTAL CONTROL OF ALL CONTENT and may add, delete, and edit anytime that you wish!

You can quickly explode your website from a mere 30 pages to an incredible 3,000 pages!

Unique Features That Improve The Visitor's Experience
These features are NOT found in most websites!

- Full Page Lightbox Slide Show that hovers over page content to display large, detailed photos (up to seven automatically, if needed)
- Easy Search by entering any key phrase like name, feature, description, etc.
- Tell A Friend right from the content page
- Related Content is listed at the bottom of page and chosen by "Smart Select" technology
- On Page Video Insertion when most other sites "link out" to YouTube or another provider, your videos are right where they belong (basic html knowledge required)
- New Feature - Ask A Question from any content page with "smart url" technology
- New Feature - Most Recent & Most Popular content boxes show your returning visitors the most relevant information at a glance!

Unique Features That Improve Search Engine Visibility

Just a few highlights of features NOT in most other sites:

Ultimate Dynamic Website

- Dynamically Optimized for the Search Engines – Implements critical elements like Page Title and Anchor Tags for each Individual topic. These are factors that are proven to lead to better rankings!

- Search Relevant Category Headings – People often begin their research within a general category and then refine.

- Optimized Images – Automatically assigns the appropriate name to your photos to signal the search engines.

- Changeable Text on the home page and content pages – Search engines primarily look for words. You can add as much as you want, when you want.

Admin Highlights (Master Control)

Total Category Control

- Add, edit, or delete as often as you like
- Create unlimited topic categories and pages
- Adjust the order that they are displayed in the menu
